

GENERAL FEATURES

- kW 3-phase motor • Quick cutter change spindle
- Hydro-pneumatic feed enables to adjust the speed of the cutters depending on profile type
- The cutter stack spindle returns to the starting point automatically
- Profile stop system is adjustable for 4 different profiles
- PVC (vinyl) and aluminum mullion profiles can be end milled within the range of +45° and -45° angle
- Top guard provides a safer working environment
- Storage for spare tools
- Robust machine body
- Max. diameter of end mill cutter is Ø 180 mm (7")
- Max. end milling dimensions H=100 mm (4") x W=225 mm (9")

STANDARD EQUIPMENT

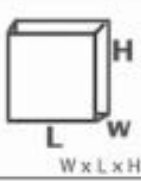

- 1x pneumatic horizontal clamp
- 1x pneumatic vertical clamp
- Air gun
- Profile table

OPTIONAL EQUIPMENT

- Pneumatic spray mist lubrication system
- Custom fixture for special profiles
- Custom cutter stack
