

GENERAL FEATURES

- Semi-automatic double head miter saw with carbide tipped circular saw blades designed for straight or miter cut of vinyl, aluminum, and wood
- The forward movement of the saw is hydro-pneumatic, and its speed can be adjusted accurately according to the material
- The clamps are pneumatic with safety features
- The left saw head is fixed in its position, and the right saw head is moved manually to its position
- The right saw head is equipped with pneumatic brake system, and when the braking key is switched to "OPEN", the saw head will not work for safety purposes
- The distance between the saw heads can be adjusted accurately by a digital read-out system
- The cutting at 0, 15, 22.5, 30 and 45-degree angles is achieved by positive locks, and intermediate angles re accurately set via handle
- Machine has been designed according to CE, UL and CSA Safety Directives

STANDARD EQUIPMENT

- 2x400 mm (16") carbide tipped saw blades
- Pneumatic horizontal clamps
- Digital read-out
- Air gun
- User's Manual

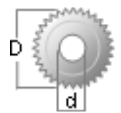

OPTIONAL EQUIPMENT

- Pneumatic spray mist lubrication
- Custom fixtures

AUTOMATIC DOUBLE HEAD MITER SAW
